

API Quality Grid

0 API meets requirements
1 API does not meet requirements

API Name	Definition				Dataset	Status Display				Use		Technical						Global Mark / 30
	Does the API have a clear description ?	Is the documentation up to date ?	Is the scope (geographic, approval, limitation of use) of use described ?	Does the API has datasets ?	Number of calls in the previous month	Availability rate in the previous month	Monthly average number of calls last 12 months	Date of last consumption	At least 1 use case is present ?	Is the swagger (O Open API 3.0) present ?	Does the API respects the REST convention ?	Is the proposed data format (JSON, XML, proprietary) unique or multiple ?	Is the authentication method specified ?	Are the API methods structured ? (http verbs, resources versus sub-resources...)	Knowing how to consume the API is described ?	Is the list of error codes documented ?
